Modelos simples en RAM Advanse

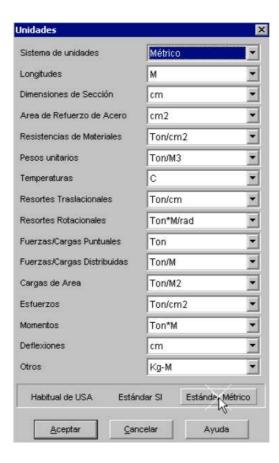

1) Ingresar las coordenadas de los nudos que conforman la estructura en el panel de datos correspondiente a Nudos – Coordenadas.

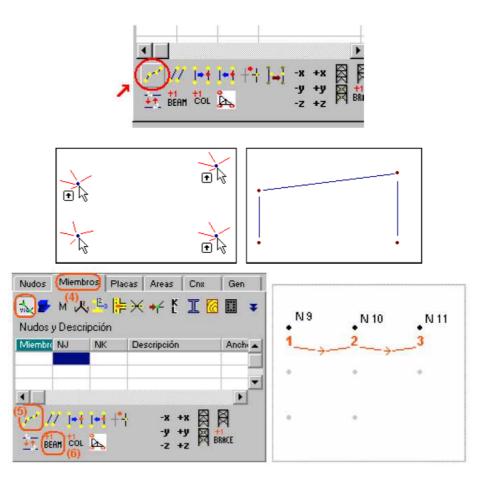

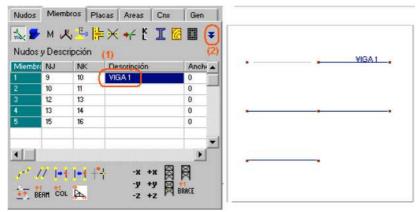

2) Revisar las unidades de ingreso

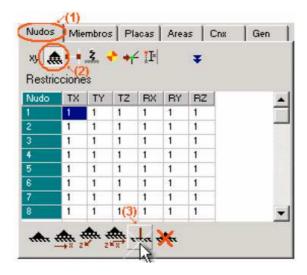

3) Luego seleccionar los nudos que se desean unir con barras, seleccionando el inicial y final de cada barra. Para ello, seleccionar Miembros – Conectividad.

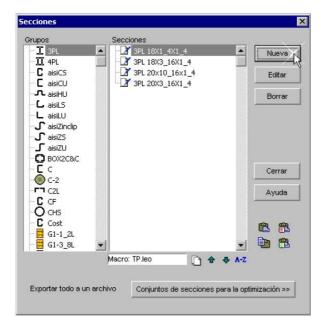

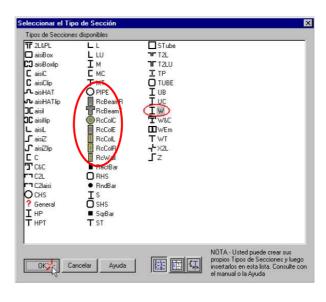

4) Luego se incorporan las restricciones a los nudos.

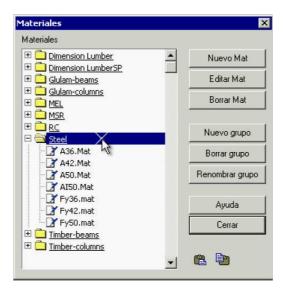

5) Creando secciones y materiales

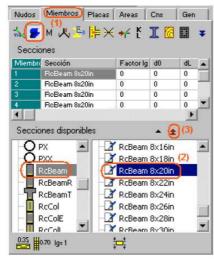

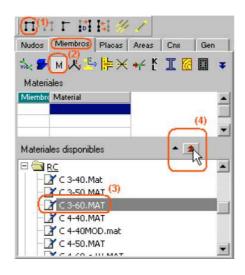

6) Condiciones de cargas
